EASY TO GROW
GARDEN
MUST-HAVE

Geraniums

The perfect and easy addition to any garden or container. Featuring vibrant red, pink and white colour options, these are known to be resistant to pests such as deer and rabbits.

Geraniums need to be wet but not soggy. Do not let the roots sit in water. Water until water starts to run out from the bottom of pot/container.

Place in a location that gets 4-6 hours of sunlight a day for maximum bloom.

You may fertilize every 2 or 3 weeks. Use a Flower and Veggie 10-15-19 fertilizer.

Geraniums prefer well draining soil. To maintain and promote growth, be sure to pinch off any flowers that are finished blooming.

Ideal temperatures for the geranium is 10° to 15°C. Keep indoors if it will freeze over night.
